**PACK MANUFACTURING COMPANY**  
**ComPACK™ Mixer**

Pack Manufacturing is excited to unveil the ComPACK™ Mixer. This deluxe mixing machine hosts a 4 Yard Bulk Hopper, chemical hopper, and a heavy-duty inline mixing head in a low-profile design. As the large volume media is pulled from the bulk hopper, additives are added from the chemical hopper at a predetermined rate. The mixing head quickly and efficiently combines the media and ejects it to the next stage in operations. Recipes can be created and saved for future use at the touch of a button. Standard models come with one chemical hopper (high or low volume), bulk hopper cross agitator, CNC milled water bars, adjustable legs, and 10 mix recipes. The Pack Manufacturing ComPACK™ Mixer is the future of container production, capable of feeding the fastest potting or bagging lines.

ComPACK™ Chemical Hopper
