Pack Manufacturing Company
PM1090-15D Water Tunnel

The Pack Manufacturing PM1090-15D Water Tunnel is smart watering system capable of being incorporated into any horticultural application. The PM1090-15D is constructed of stainless steel with a polycarbonate hood. It is designed to provide controlled watering capability for almost any style container. The PM1090-15D not only ensures an even water distribution among plants but also prevents overwatering and water waste by controlling the water flow. The Water Tunnel can be wired into a larger production line or used as a staging line for watering prior to loading onto trucks. The Pack Manufacturing PM1090-15D comes equipped with an aluminum frame conveyor with PVC rollers and stainless bearings for smooth, trouble-free service. Extra wide, extra tall, and hanging basket options are available to accommodate the largest containers.
