## PACK MANUFACTURING COMPANY HIGH SPEED POTTING SYSTEM

Pack Manufacturing High Speed Potting Systems, as the name implies, are the workhorses of any potting operation. Pack Manufacturing offers three different models of High Speed Potters. Regardless of which model you choose, features like self tracking belts, sealed bearings, and direct drive transmissions come standard. Pack Manufacturing doesn't look for a minimum spec when designing our equipment- we build our equipment to last. Every piece of equipment we build is intentionally over-engineered for rugged dependability. When you purchase a Pack Manufacturing High Speed Potting System, you are making an investment that will return its cost many times over.
