PACK MANUFACTURING COMPANY PM20 MIXER & FLAT FILLER

The compact Pack Manufacturing PM20 Combination Mixer and Flat Filler is an economical solution for new or small grow operations. Deciding which jobs to automate and which jobs to do manually can be a challenge. Pack Manufacturing is making that decision easier with the PM20 Mixer and Flat Filler. This innovative new design combines the functionality of a Batch Mixer with a high volume mobile Flat Filler. The intuitive touchscreen control allows easy operation of all machine functions. The PM20 is equipped with a 1 Cubic Yard hopper and an integrated internal mixer. A clear polycarbonate lid allows you to watch your media mix and provides the additional safety feature of an automatic cut-off if the lid is opened. Standard features on the PM20 include an adjustable rotary brush, adjustable pot sweep, auger soil return, integrated CNC-milled water bar to add water to mixes, and a 15-inch-wide filling conveyor. The Pack Manufacturing PM20 is utilitarian, compact and versatile- capable of filling about any container type including liner trays, nursery pots, and hanging baskets- all on a mobile platform easily wheeled to different stations. Instead of spending limited capital on manual labor, make an investment that will repay you many times over in increased productivity and lower costs.
