## PACK MANUFACTURING COMPANY 3.8 PEAT BALE SHAVER

The Pack Manufacturing 3.8 Bale Shaver and Peat Fluffer is ideal for decompressing, or “Fluffing”, 3.8 cubic feet bales of compressed peat, coir, or premixed media. The Bale Shaver’s rotating tines uniformly break up chunks of peat as they pass from the loading area to the discharge at the top of the incline. The included water bar attachment enables an adjustable amount of water to be applied to the fluffed peat being ejected. Optional adjustable casters allow the Bale Breaker to be moved around easily and service multiple filling lines. Consistent grow media, increased bale yield, and labor efficiency combine to make the Pack Manufacturing 3.8 Bale Shaver a valuable tool for any grower using 3.8 bales.

### SPECIFICATIONS

10'x14" CLEATED INCLINE CONVEYOR  
230 VAC SINGLE OR 3 PHASE  
BALE HANDLING SHELF

### OPTIONS

CUSTOM CONVEYOR LENGTHS
