

**Pack Manufacturing Company
Deluxe Water Tunnels**

The Pack Manufacturing Deluxe Water Tunnel is a watering system designed to provide controlled watering capability for container grown plants. The Pack Manufacturing Water Tunnel ensures an even water distribution and prevents overwatering and water waste by controlling the flow to only water when a container is present. The Water Tunnel can be wired into a larger production line or used as a staging line for watering prior to loading onto trucks or staged. The Pack Manufacturing Water Tunnel comes equipped with a 5 ft conveyor and stainless bearings for smooth service. Custom widths, lengths, and hanging basket options are available to accommodate even the largest containers. Pack Mfg. Stainless Water Tunnels come equipped with adjustable risers, variable speed control, and CNC-milled water bars for a long life with dependable performance. For longer staging areas, the **PM1090-15D** is available with an extended 10' roller conveyor takeover, for an overall 15' length of production space. Custom lengths are available.
