

**PACK MANUFACTURING COMPANY  
PM1220 VERTICAL BALE SHAVER**

If you are using compressed peat moss, coir, or premixed substrate, then the new Pack Manufacturing PM1220 Bale Shaver is for you. Just place a palletized bale of peat or coir, up to 135 cubic feet, inside the machine, close the doors, and operate from the easy-to-use touchscreen controls. The elevator feeds the bale into the horizontal scraper that takes off thin layers of the peat or premixed substrate. The Pack Manufacturing PM1220 Bale Shaver will produce a consistent texture and flow throughout the entire bale. Pack Mfg. Bale Breakers are the ideal solution to decompressing palletized peat moss or coir. Compressed peat moss has many advantages in shipment and storage, however, when it comes to potting and growing, compressed grow media has many disadvantages. Thawing frozen peat bales is time consuming, and compacted peat requires more water and produces heavier pots. Fluffed peat is better for mixing, watering, and filling containers. Water bars are standard on every Pack PM1220 Bale Shaver. The Pack Manufacturing Bale Breaker series is undoubtedly the best process for compressed bale yield with the ability to control moisture content and product integrity.

SPECIFICATIONS	FEATURES
230 VAC, SINGLE OR 3 PHASE	BULK MATERIAL LOW LEVEL SENSOR
MAX BALE SIZE: 59" W x 56 3/4" D x 113" H	AUTO WATER APPLICATION
OUTER DIMENSIONS: 66" W x 77" D x 135" H	TOUCH SCREEN CONTROL PANEL
OUTPUT UP TO 1100 CUBIC FEET PER HOUR	VARIABLE SPEED MOTORS FOR PRECISION CONTROL
WEIGHT: 3,150 LBS	ENCLOSED DESIGN REDUCES DUST PARTICLES
