

PACK MFG.

**THE PACK MANUFACTURING
COMPANY
FABRIC POT FILLER**

Growers using more environmentally friendly fabric pots can now keep pace with the rest of the industry with the new Patent Pending Fabric Pot Filler from Pack Manufacturing! The Fabric Pot Filling System takes the fabric pot at the start, travels the pot along the potting conveyor where it is held open, filled by the potter, and deposits the filled pot to the powered takeoff. All excess grow media is delivered back into the hopper with the open conveyor extended heavy duty soil return. The open conveyor soil return system supports nearly any media type. What in the past has been a labor-intensive task of manually filling cloth pots is now an automated task, with speeds comparable to standard plastic pot production. The Fabric Pot Filler System is easily adjustable to support cloth pots from 1-gallon to 15-gallon sizes. With the Fabric Pot Filling System growers can take advantage of the benefits of fabric pots and still retain the production capabilities of an automated filling system. This system can also be incorporated into other Pack Manufacturing Potters.

Fabric Pot Filler shown with 4 Cubic Yard Double Potter.

Fabric Pot Filler system available on other equipment lines, including:

PM1100 PACK FILLER

PM1000 AND PM1500 HIGH SPEED POTTERS

Verified for use with Root Pouch brand fabric pots!

SPECIFICATIONS	FEATURES- FABRIC POT FILLER	FEATURES- POTTER
4 CUBIC YARD SOIL HOPPER	VERTICAL AND HORIZONTAL ADJUSTMENT	VARIABLE SPEED SOIL AND BELT
FROM 1 GAL TO 15 GAL POTS		INDEPENDENT HOPPER CONTROL
230 VOLT SINGLE OR 3 PHASE	VARIABLE SPEED CONTROL	POWERED TAKE OFF
900 - 1,100+ 5 GAL. POTS AN HOUR	DELIVERS POUCH TO TAKEOFF	ADJUSTABLE SOIL GATES
DIRECT DRIVE GEARBOXES	INTEGRATED WITH POTTER	MEDIA VIBRATOR
2 YEAR WARRANTY	SUPPORT FOR MOST FABRIC POTS	HD EXTENDED SOIL RETURN
