

**PACK MANUFACTURING COMPANY**  
**MOBILE SPACING FORKS**

Pack Manufacturing Mobile Spacing Forks are the definitive answer to tray and container transportation. Moving container grown plants from one location to another can be an expensive endeavor when considering labor costs. The Patent Pending Pack Mfg. Mobile Spacing Forks provide a one-time expense to alleviate that cost year after year. The Mobile Spacing Forks connect to the mast of a forklift. Multiple conveyor belts act as a mobile platform to transport rows of containers. Simply drive the forklift to the chosen location and activate the machine. As the operator drives in reverse, the conveyor system will unload, spacing each row evenly. A touchscreen controller mounts to the cab of the forklift, allowing the operator to remain seated and still have full control. The spacing and tray size may be adjusted from the touchscreen. Pack Manufacturing Portable Spacing Forks take moving containers from a labor-intensive job to a quick ride on the forklift.

SPECIFICATIONS	FEATURES
SOLID STEEL FRAME FOR MANY YEARS OF USE	HANDLES VIRTUALLY ANY TRAY TYPE
POWERED BY VEHICLE ELECTRICAL SUPPLY	TOUCHSCREEN CONTROLS FOR EASY OPERATION
ALLOWS FOR EXTREME CUSTOMIZATION	LOW MAINTENANCE DESIGN
MULTIPLE OPTIONS AVAILABLE	EASY OPERATION- LOGICAL CONTROLS DO THE MATH
