

PACK MANUFACTURING COMPANY 2 YARD BAGGER

Most large growing operations are now mixing their own soil media. Growers tend to find grow media recipes that work well with their plants in their climate. If you want to store this media for future use or share it with the world by offering your own custom bagged potting soil, then the Pack Manufacturing 2 Yard Bagger is for you. The operator simply places a bag around the quick-clamp bag chute and steps on the foot pedal to open the bag and fill from the attached two cubic yard hopper. An optional digital or touchscreen display allows for various bag sizes to be stored in memory for easy recall and repeatability. Bags can be sealed with a manual wire tie or optional automatic hot air sealer/ trimmer.

**CUSTOM BAG
KICKER**
