

DIRECT DRIVE POWER TRANSMISSION

PACK MANUFACTURING COMPANY ACCUMULATOR TABLES

The Pack Manufacturing Accumulator Tables are a great addition to any automated production line, whether for offloading or removing bottlenecks in production. Pack Mfg. Accumulator Tables pull completed pots toward the center, giving workers the chance to unload or stage containers without worrying about them ending up on the ground. Unloading automated systems tend to form a production bottleneck as workers cannot remove completed products as fast as an automated line can produce them. Pack Accumulator Tables provide that time buffer to allow workers to unload without slowing production. Pack Manufacturing Accumulator Table tops are made of lightweight aluminum with a smooth finish for easy cleaning. The top is supported by a rigid solid steel frame with adjustable height. Pack Manufacturing Accumulator Tables have a variable speed control and are powered by a standard 120-volt plug. The standard tabletop is 4 feet in diameter, however 6 feet and custom-size options are available.

ADJUSTABLE GUIDE RAILS
