

**PACK MANUFACTURING COMPANY**  
**½ YARD BATCH MIXER**

Pack Manufacturing Batch Mixers are designed for uniform blending of a wide variety of materials, such as peat, bark, sand, perlite, chemicals, and fertilizes. Heavy duty custom buildouts are available for extremely heavy mixes. The ribbon blender channels material from the hopper sides toward the center discharge hatch. Ingredients added to the hopper are quickly and uniformly mixed and easily removed via the central hatch. Pack Manufacturing Batch Mixers are highly customizable and can be incorporated into many different applications. The small ½ Yard Batch Mixer is perfect for low-volume growers wanting to cut labor costs.
