

## PACK MANUFACTURING COMPANY PNEUMATIC MUSHROOM BAGGER MIXER

The Pack Manufacturing Pneumatic Bagger is a tribute to the growing mushroom industry. As the number of small and medium sized mushroom farms has exploded, Pack Manufacturing worked with seasoned veterans of the industry. The result was the Pack Manufacturing Mushroom Bagger Mixer- a combination Batch Mixer and Bagger. The Pack Mfg. Mushroom Bagger includes a pneumatic shuttle with an adjustable volume output, operated from a foot pedal control. Each time the foot pedal is pressed, one set volume of media is delivered. The output volume is user adjustable and custom inserts are available for smaller volumes.

While developed as a solution for the mushroom industry, the Bagger option works in multiple applications in horticulture and agriculture, such as filling cloth pots and delivering consistent volumes of most any type of growing media.

Custom options are available to automate multiple processes. With plenty of productivity solutions available, the Pack Manufacturing Mushroom Bagger can be built for the ideal needs of any operation. Compressed Coir options available. Call Pack Manufacturing today to discuss your application.
