

**PACK MANUFACTURING COMPANY
PM1092 SUB-IRRIGATOR**

The Pack Manufacturing PM1092 Sub-Irrigator provides the advantages of ebb-and-flow irrigation in an in-line setup. The Pack Mfg. PM1092 is ideal for use in seeding, propagation and shipping lines, where overhead watering would either be insufficient or not desirable. The final watering before shipping can be critical, and the Pack Manufacturing Sub-Irrigator fully waters the roots without soaking the foliage and containers, thereby eliminating the opportunity of mold or mildew to grow on plants during transit. Product is carried by a spacious 9' x 24" specially designed conveyor with variable speed control to provide full, uniform watering to each container.

SPECIFICATIONS	OPTIONS	FEATURES
9' x 24" PLASTIC CHAIN CONVEYOR	CASTER KIT	DIRECT DRIVE TRANSMISSION
STANDARD 120 VAC PLUG	OVERHEAD WATER MANIFOLD	VARIABLE SPEED DRIVES
CNC MACHINED WATER BARS	EXTRA WIDE	ADJUSTABLE RAILS
